

# SHOCK BAG V4

## Item:

XKTSHOCKBAGPARAPACK-V4 with several possibilities of quick hanging system to the choice on the skydiver or the harness.

## DESCRIPTION:

The new version of the "SHOCK BAG V4" shock absorber bag is used for SOLO skydive with load container or Skydive TANDEM. It preserves the physical integrity of the skydivers tandem or a heavy loader skydiver during a hazardous or poorly controlled landing day or night. Simple and autonomous installation, the Shock Bag inflates under sail by pulling on a handle. The Shock Bag is completely independent of the parachute. The "SHOCK BAG V4" can be used in different configurations. For this new model and without changing version, it is possible to equip by:

- Direct securing on the military load parachute harness or the tandem passenger harness;
- Direct connexion to the man (para or pax tandem) by Abdominal strap optional.
- The extended handle version is optional.

## TECHNICAL FEATURES:

The uses are diverse:

- Use with all Military and Civilian parachutes ;
- Landing on unplanned area (urban, forest, desert, ice ... ) ;
- Landing with a passenger who is injured, unconscious or has a disability ;
- Landing with heavy load carrying (**option** : it is recommended to use the FXC15 quick release system).

## FEATURES :

- Fabric: PARAPACK, resistant to sliding landings on sandy or grassy ground. COBRA quick release buckle with hook-and-loop strap. Armored seams resistant to tensile forces.
- Connexion :  
**Solution 1:** on the tandem passenger harness or parachute harness through locking loops (top) and thigh straps (down).  
**Solution 2:** on the skydiver or tandem passenger directly through the removable lap strap and thigh straps.
- Operation: simple implementation by handle type golf ball. When inflated under the canopy, the Shockbag absorbing the weights landing.
- Improvements: An air vent at the back of the bag that allows for faster deflation during landing and choice of securing for the same model, remote handle and lap strap (the two options applies)
- Size: length / width / Thickness . 44cm x 50cm x 3 cm to 4cm (folded ready for use)
- Weight in use configuration: about 1.4 Kg
- Black color

## OPTIONS:

- Remote handle grip. # XKTSHOCKBAG-PD
- Removable abdominal strap with plastic buckle. # XKTSHOCKBAG-SA
- FXC15 quick release system. # FXC15

The SHOCK BAG V4 "comes with a user manual.
